**SHORAITEKU INTERSTELLAR**

Products developed in-house at Shoraiteku Interstellar are available at a discounted rate of up to 1.5% for qualifying employees. Any loss or damage to equipment prior to full payment will be recouped from employee salaries.

**KAISER-SCHMID**

Dealing in weaponry and other offensive hardware, Kaiser-Schmid has been an armaments partner with Shoraiteku Interstellar for decades. The reliability of their goods is matched only by their lethality.

**EVOTEK**

With a broad range of products in the aid and support categories, Evotek offers invaluable assistance to those Shoraiteku Interstellar employees authorized to receive medical attention.

**ASKLEPIOS**

Asklepios provides more highly-specialized medical equipment to complement the broader range offered by Evotek; recommended for higher-priority employees or more dangerous drop zones.

**EXHANCE**

For employees in need of an additional pick-me-up, Shoraiteku has partnered with the extreme performance brand EXHANCE, which offers a range of injectors to compliment corporate training. Each purchase of an EXHANCE product will enter the buyer into a prize draw to win the perception of a week's break, courtesy of Synthscape Holidays.

**HOT SOULZ**

Due to an administrative error, the children's shoe manufacturer Hot Soulz was awarded a two-year footwear contract with Shoraiteku Interstellar. While the contract continues to be honoured, it is not recommended that employees purchase these items for use in the field.

**K1 Plasma Pistol**

- + Fires plasma rounds
- + Semi-automatic

In these harsh and dangerous times, it's important to have something you can depend on. The Kaiser-Schmid 'Defender' Plasma Pistol has got you covered. Single shot, semi-automatic, and featuring beginner-friendly point-and-shoot action, you'll be up and running with this pistol in next to no time.

While its lightweight build might come at the expense of stopping power, you can be safe in the knowledge that if the first bullet doesn't stop them, seven more are waiting to hit their mark as fast as you can pull the trigger.

**K4 Riot Shotgun**

- + Fires spread of impact Plasma rounds
- Slow reload

The world today is a complicated place. Technology, for all its benefits, can be a confusing and fatal hurdle in the heat of battle. For those who are looking for something with a little more simplicity, we present the Kaiser-Schmid K4 Riot Shotgun.

Taking our cues from simpler times, the K4 is designed to solve your disputes up close and personal, with as much force behind each shot as possible. Was there a face in front of you when you pulled the trigger? Not any more there isn't. With the K4's patented Plasma Spread, you'll be picking bits of teeth out of your hair for weeks.

## SMG

The term 'submachine gun' perhaps unfairly maligns the weapon we are presenting here today. After all, the Kaiser-Schmid SMG is in no way less capable than the 'full' machine gun. Rather, we've simply taken the best aspects of the heavier weapon – its automatic firing mode, and high fire rate – and married them to a lighter, more user-friendly form factor.

While this has resulted in a higher spread and smaller magazine size, the resulting weapon remains perfect for cramped indoor incursions, where the full machine gun would be clumsy and cumbersome. One for the guerrilla on the go.

- + Fires mini plasma rounds
- + High fire rate

- Low ammo capacity

## V1-PER Assault Rifle

We understand the demands of today's interplanetary corporations. Sometimes, even with the best will in the world, diplomacy just doesn't work out. Merger gone south? Buyer with cold feet? Ex-CEO not quite as retired as you'd like? Whatever the reason, make sure your enforcement teams are armed with the best.

The Kaiser-Schmid V1-PER Assault Rifle boasts an industry-defining rate of fire, more than earning its reputation for quickly delivering a hail of bullets into - or at least toward - your enemies. After all, when there are multiple targets, inaccuracy is just an opportunity to hit someone new.

- + Fires plasma rounds
- + Automatic

- Low accuracy

## V60 Light Machine Gun

Don't get us wrong, we love explosions. Really, we do. But when you're faced with overwhelming infantry numbers, we believe the Kaiser-Schmid automatic Light Machine Gun is the go-to weapon for mass suppression.

As you might expect, our LMG goes beyond just 'automatic'. Keep that trigger depressed for a few seconds, and it'll warm to its task, increasing its fire rate and projectile speed until you've got bullets that simply don't stop after initial impact. Sure, the kickback will mean that you have less say over exactly where those bullets will go, but you'd better believe that whatever it does hit will feel it. As will everything behind it for several dozen yards.

- + Fires plasma rounds
- + Large ammo capacity
- + Continuous fire causes shots to penetrate

- Low accuracy  
- Slow reload

## V8 Chaingun

We love the chaingun. Its large and imposing structure is a design classic. The chaingun has long been the go-to for situations where you want the thing in front of you to have several hundred more holes in it than it currently does.

Our own take on the chaingun adds a few twists to that traditional formula; as the weapon begins to fire continuously, a unique gyroscopic motor kicks in to counteract any recoil. As a result, the longer you hold the trigger, the more accurate you'll find your shots becoming, until several hundred holes become one very large hole in your very dead target.

- + Fires plasma rounds
- + Large ammo capacity
- + Fire rate increases over time

- Heavy weapon  
- Low accuracy  
- Slow reload

### R9 Rapid Rocket Launcher

- + Fires missiles
- + Charge to increase missiles fired

- Low ammo count

There's an old adage that seems to have stood the test of time. Good things come in threes. It might seem quaint to put much stock in the words of a world long since left behind, but at Kaiser-Schmid, we like to learn from the past in the hope that we can push further into the future.

It was with this saying in mind that we designed the Kaiser-Schmid Burst Fire Rocket Launcher. Our unique deferred loading system allows the user to queue up between one and three of our standard explosive rockets, and loose them in a single devastating barrage.

- + Fires mini missiles
- + Charge to increase missiles fired

- Low ammo count

### R3 Rapid Rocket Launcher

After introducing our popular Burst First Rocket Launcher model, we received a great deal of feedback. Long story short, people loved it. They loved how it put the number of rockets fired into their hands. It was the first truly democratic multiple-round rocket launcher on the market. There was just one criticism: it was too big, too powerful. It was difficult to fit into their busy, transitory, lives.

Introducing, then, a lightweight alternative: the Rapid Rocket Mini-Launcher from Kaiser-Schmid. Using a new spooling mechanism to allow users to change their output on the fly, users can 'charge' their weapon to unleash between one and three mini rockets depending on what the situation demands.

- + Fires fragment grenades
- + Explodes on impact

- Self-damage warning
- Slow reload

### V4-PER Grenade Launcher

When we at Kaiser-Schmid were designing our latest line of fragmentation grenades, our testers all said the same thing: they loved them. The generous explosion radius, the maim-centric shrapnel design, all of it was a great success. There was only one consistent critique: they were throwing so many grenades, their arms were getting tired.

Enter the Kaiser-Schmid Dominator Grenade Launcher. With its 4-round cylinder loading mechanism and comfortable two-handed firing stance, even the most enterprising customer will find their needs met and their arms rested and ready for whatever life throws at them.

## MGV MagRail Handgun

The handgun has been unfairly maligned over its long and storied history. Too often it is overlooked in favour of something bigger, or flashier, or that results in a greater amount of deadly explosions.

For our MGV MagRail Handgun, we decided to drill down into the fundamentals of the classic pistol, and create something truly special. A handgun that stayed true to its roots, while encompassing the technological progress made since its original conception.

The result is, basically, a more powerful pistol. Using our high-density metal of choice - tungsten - the MagRail Handgun fires balls with incredible force, and achieves tremendous destruction on impact.

+ Fires magrail balls  
+ Explodes shortly after impact

- Slow fire rate  
- Self-damage warning

## MGTX MagRail Blaster

Tungsten. Some say it was known in ancient Earth mythology as "Metallen av gudarna", or metal of the gods. We believe this rare and precious material was worshipped for its hard and dense properties.

While we can't begin to understand the mysterious ways of our 21st Century ancestors, we do know that they were on to something here. Our MGTX MagRail Blaster uses the highest-grade Tungsten, firing a concentrated pack of balls intended to spread over a wide area and delivering unconscionable damage to anyone unlucky enough to be within close range of a discharge. As with all spread weapons, the MagRail Blaster is less effective at longer ranges. We like to see that was just another excuse to be in the midst of the action.

+ Fires magrail balls  
+ Semi-automatic  
+ Explodes shortly after impact

- Slow reload  
- Self-damage warning

## MGX MagRail Launcher

+ Fires magrail balls  
+ Explodes shortly after impact

- Heavy weapon  
- Slow reload  
- Self-damage warning

Welcome to the big league. While most of our catalogue is perfectly suitable for your garden-variety paramilitary incursions, we know that sometimes the situation calls for something a bit more substantial.

The MGX MagRail Launcher is as substantial as they come. It's big, it's bulky, and it fires tungsten balls twice the size of our nearest competitor. Don't even get us started on the force this thing fires with. Seriously, we had a guy working on these descriptions; he broke down trying to put it into words. Suffice to say even heavily fortified targets stand little chance with one of these bearing down on them.

As if all this wasn't enough, every so often the MagRail Launcher will just fire a much more powerful projectile. We don't even know why this happens. Rather than look into it, we're passing the benefits on to you.

### Vulture Sniper Rifle

- + Fires high damage plasma rounds
- + Slow motion while aiming

- Low ammo capacity
- Slow fire rate
- Slow reload

As purveyors of top-of-the-line weaponry for all occasions, it is important to us not to show an unfair bias towards any one style of combat. While the traditional view of heroism in battle is one of close-quarter frenzy and high-risk havoc, we would like to challenge that perspective. After all, who's to say; perhaps the truly heroic act is in coldly pulling the trigger of a sniper rifle and watching as – several hundred feet away – a pink cloud appears in place of your target's head.

With the new Kaiser-Schmid Vulture Sniper Rifle, such predatory behaviour can be yours to enjoy, all from a safe and heroic distance. What's more, with its slow, deliberate fire rate, the Vulture provides the user with an unparalleled amount of time to reflect on their actions between each devastatingly lethal shot.

- + Fires ricocheting flak ammo
- + Luck increases bullet ricochet chance

- Slow reload
- Low ammo capacity

### FLK-V Revolver

Kaiser-Schmid is proud to count among its customers some of the most adept and capable weapons experts in the galaxy. We know that, when one of our customers pulls the trigger, they have their target firmly within their sights.

That said, we also know that sometimes targets aren't obligingly stationary. In such cases, who are we to deny our customers a second chance? Introducing, then, the FLK-V Revolver – a powerful, deliberate handgun that fires projectiles specially designed to ricochet against any surface they come into contact with, turning a single bullet into a rebounding mass of lethal metal.

IMAGE  
NOT FOUND

- + Fires explosive rounds
- + Final shot fires blue flare
- + Chance to ignite enemies

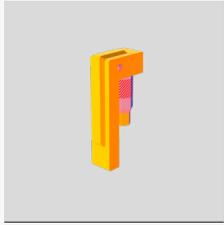

- Low ammo capacity
- Slow fire rate

### RA-3 Flare Gun

As part of your fully-featured Shoraiteku Interstellar Emergency Package, installed as standard on all operational Shoraiteku vessels, the Flare Gun is an important piece of survival equipment. In the unlikely event of an unscheduled or emergency landing, proudly aim the Flare Gun into the air and fire with confidence. Under optimum conditions your flare is visible by others in a three mile radius from the detonation point, inspiring comradery and a willingness to assist.

Your confidence in your rescue is rivalled only by your gratefulness to Shoraiteku for their foresight in providing such important equipment to their employees, regardless of rank or value to the company.

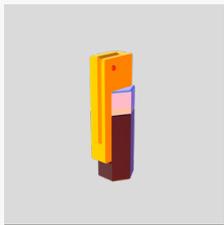

+ Delayed explosion

## Fragmentation Grenade

It doesn't get any more basic than this. The Kaiser-Schmid Fragmentation Grenade combines old world wisdom with modern-day firepower, all in the palm of your hand. Simply prime your grenade, lob it towards a problem, and wait for a solution to present itself. Easy.

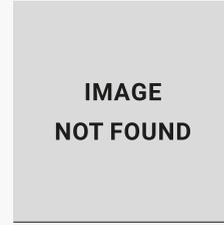

+ Explodes into mega cluster shortly after impact

## Cluster Grenade

The humble grenade has a long a storied history. Its use on the fabled battlefields of Earth are well documented, and it's a testament to its versatility that a version of that grenade is still in use today.

So, rather than mess with perfection, the Kaiser-Schmid Cluster Grenade just crams a whole lot of perfection inside one big, sturdy, shell. On ignition, six miniature grenades separate from the shell and detonate, each with half the force of a normal grenade. We're not going to add it up, but that equals a whole lot of destruction.

+ Flame explosion on impact  
+ Leaves flames

## Incendiary Grenade

Taking a literal approach to the scorched earth policies of some of our clients, we would like to present the Incendiary Grenade. The grenade is tightly packed with flammable liquid designed to quickly and irreversibly adhere to skin and clothing on contact. With its pressure-sensitive plates, the Incendiary Grenade will active on immediate impact, allowing careful and precise targeting.

Due to the nature of the device, clients may experience reduced effectiveness if deploying against inorganic targets.

+ Delayed mega-explosion  
+ High damage

- Self-damage warning

## Mini MYCE

We founded Kaiser-Schmid on a simple dream; to give our customers nuclear weapons whenever and wherever they needed them. The original MYCE was a huge step in that direction – for the first time, anyone sufficiently motivated could get their hands on a nuclear bomb. Our dream was becoming a reality.

However, after the irradiated dust had settled, we realised that the MYCE was simply too big, too prohibitively bulky, to be the truly egalitarian nuclear weapon we wanted it to be. With that in mind, we set about creating the Mini MYCE. Utilising the latest techniques in miniaturisation, we have finally developed a nuke you can hold in the palm of your hand, assuming you're wearing some kind of lead-lined glove.

IMAGE  
NOT FOUND

## Incendiary Ammo

Everyone here at Kaiser-Schmid has tremendous respect for the humble bullet. It's simple, it's effective, and it works. There's no argument there from us. Without the bullet, we'd all be out of a job.

However, we would be doing our customers a disservice if we didn't always strive to improve. With this in mind, we're excited to introduce our modern spin on a timeless classic; the exclusive Kaiser-Schmid Incendiary Ammo range. Available for any bullet, shell, shot or other projectile in our original range, Incendiary Ammo acts just like the bullets you're used to, but with a fiery twist. They set people on fire.

+ Chance to ignite on hit

IMAGE  
NOT FOUND

## Explosive Ammo

Sometimes, the greatest ideas come to you at the drop of a hat. Whether you're Archimedes taking a bath or an unpaid intern tasked with coming up with fifteen viable weapon upgrades each day or otherwise risk losing your job, lightning can strike at any time.

So, when we heard the words "Explosive Ammo" coming out of an intern's mouth, we stopped listening and got straight to work. The result is the Kaiser-Schmid Explosive Ammo modifier – an optional extra that will work with almost our entire range of weaponry, giving your bullets an occasional bit of additional emphasis. Or to put it another way, some of them will explode.

All this thanks to that anonymous intern's one moment of genius. Who were they? It might be we'll never know.

+ Chance for shots to explode on hit

IMAGE  
NOT FOUND

## Ricochet Ammo

Okay, look. We hear you. Some of our customers just aren't that great at shooting straight. We get it, accuracy's not for everyone. You've been clamouring about this problem and, well, we might just have found a solution.

The Kaiser-Schmid Ricochet Ammo modifier is a genuine, bona fide miracle for those of us less precise-minded. Designed to work with a wide array of weapons and bullet types, a quick installation is all that's keeping you from stepping into a beautiful world of erratic flying metal. So what are you waiting for?

+ Shots ricochet off world

IMAGE

## Ammunition Synthesizer

Shoraiteku Interstellar takes great pride in the quality of its employees. Whether it be through rigorous training, award and milestone schemes, or company away days, you can be sure that your ability to perform your job is always our number one priority.

As part of a new incentive scheme, we are happy to provide you with this Shoraiteku Interstellar Ammunition Synthesiser. This performance tracking device keeps tabs on your effectiveness in the field, and will intermittently reward a successful target elimination with a fully replenished weapon clip.

We hope that positive feedback the Ammunition Synthesiser provides will stimulate our employees to strive harder to achieve our - and therefore their own - goals.

+ Chance to kill ammo on kill

### Barrage RR-05

+ Deploy a barrage of 5 missiles

Time and time again, our customers have requested a product that could be deployed in the most severe and dire circumstances; a device that, in an emergency, could be used to quickly and efficiently help turn the tides of battle.

As with any suggestion from our customers, we looked at these requests closely, and we took them to heart. However, we also know that our customers come to us for our unique take on armaments, and would not be satisfied with the passive shield or non-lethal technology of our competitors. Our customers want something more proactive.

So, introducing the Kaiser-Schmid Barrage. At the push of a button, not one, not two, but five guided missiles will burst forth to seek out and destroy the hostile forces closest to you.

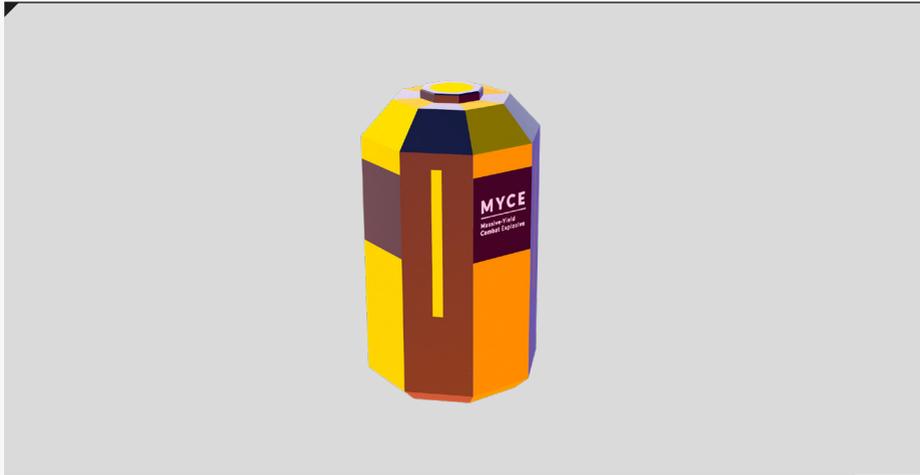

### Barrage RR-16

+ Deploy a barrage of 16 missiles

When, last year, we introduced our new Barrage deployable, we couldn't begin to guess how popular it would become. We were truly humbled by the response we received from our loyal customers. Through all of it, however, we came to realise that once again we had underestimated you. We learned that, in the most extreme circumstances, not even five guided missiles were enough. So we went back to the drawing board.

The result was The Kaiser-Schmid Mega Barrage. Much more than simply three Barrages taped together, the Mega Barrage fires off sixteen guided missiles at the flip of a switch, pouring down fire and brimstone upon anything that seems even vaguely menacing within a twenty metre radius. If that's not enough, frankly, we're beginning to worry about you.

## MYCE

- + Deploys nuke
- + Extremely high damage
- + Large radius

- Self-damage warning

Look, we know what you're thinking. You took one look at the Kaiser-Schmid Massive Yield Combat Explosive and thought to yourself, 'That's a nuke. They've just made a nuke.' Well, you got us. Despite pronounced concerns from certain ex-shareholders, we were committed to our original vision for this company: to give our customers bespoke nuclear capabilities as and when they need them.

What's more, the MYCE is completely idiot-proof. The days of 'launch codes' and 'authorisation' are far behind us, and instead we present to you The Button. Whenever you're in need of a nuclear detonation, simply depress The Button, and change into your cold weather gear: a nuclear winter will already be on its way to your location.

- + Deploy a MK-II detonator

## Detonator MK-II

Your Shoraiteku Interstellar Detonator MK-II is a high-quality piece of explosives hardware, designed for use by an ordnance expert with an EWM qualification of 3 or higher. If you are not qualified at this level, please carefully return the Detonator MK-II and report this direction to your supervisor.

Properly operated, the Detonator MK-II will initiate a delayed explosion that emits enough force to severely damage anything organic within its blast radius, yourself included. For this reason, please make sure to use the expertise gained during your training to ensure that you and your colleagues are at a safe distance at all times.

+ Befriend assault rifle drone

### MK-A Drone

For decades, Kaiser-Schmid has prided itself on producing military-grade weaponry for consumer-grade prices. Now, we're excited to expand our horizons and take to the air with our MK-A automated drone. Packed to the brim with our trademark burst-fire assault hardware, just flip the switch and start enjoying the protection that comes with your own orbiting bodyguard.

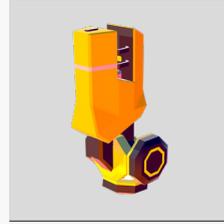

+ Befriend rocket drone

### MK-R Drone

For the more discerning customer, the Kaiser-Schmid MK-R automated drone picks up the slack where the MK-A leaves off. Completely new manufacturing techniques have allowed us to fit a fully-featured rocket launcher into the sleek chassis of the MK-R drone, transforming it from a personal security device to a top-of-the-line airborne weapons system.

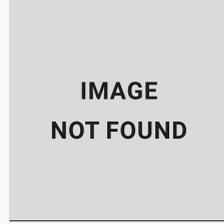

+ Befriend magrail drone

### MK-M Drone

At Kaiser-Schmid, we've always been big fans of the classic aesthetic of the orbital weapons platform; the clean lines, the smooth movement, and – most importantly – the enormous gun. So, when we came to design our latest line of offensive personal drones, we immediately knew from where we should draw our inspiration. The resulting MK3 drone is an instant classic: a gyroscopically-mounted MagRail launcher that orbits its user with the same ominous menace as the moon-sized satellites that inspired it.

+ Deploy turret on use  
+ Chance to spawn missile turret

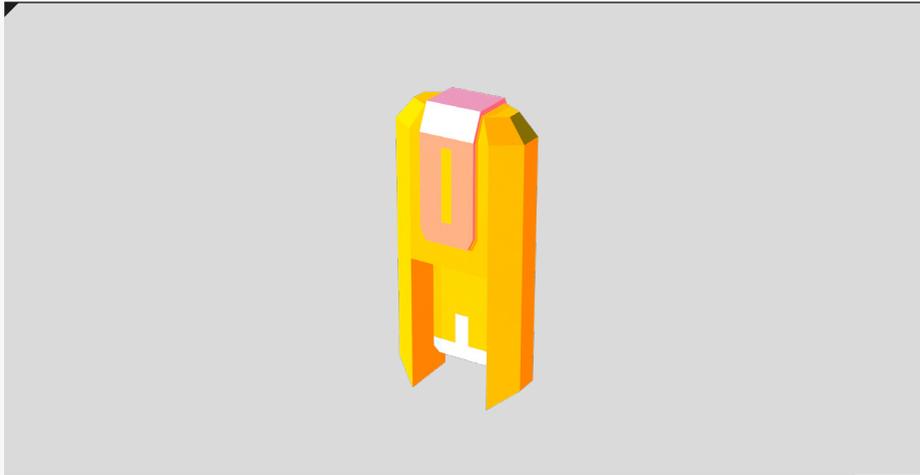

### Deployable Turret

As a Combatant class Shoraiteku Interstellar employee, you have been issued with our Deployable Turrets equipment pack. These turrets are intended for use in ground combat situations, and upon deployment will automatically target and fire upon hostile forces.

There are currently two variants of the Portable Turret in production. The Standard turret will be most commonly available, and fires regular bursts of plasma projectiles at a target. Also available, albeit less frequently, is the Rocket turret variant. This turret will fire a barrage of explosive rockets at a target.

Unfortunately, and due to an unforeseen issue in the labelling and packaging of these portable turrets, it may not be possible to identify which variant you have been issued with until deployment.

### Slomo

+ Gain slow motion for 8 seconds

This container of Evotek Slomo is restricted for use only with specially-authorized persons within an Evotek-approved medical or security partnership. Upon activation, the user will experience the flow of time at a greatly reduced rate, allowing for pinpoint precision and unparalleled reaction times. Time-sensitive tasks such as emergency manual surgeries are rendered not only possible, but almost elementary. The user, meanwhile, suffers no ill-effects either during or after the Slomo's period of efficacy.

Due to the potency of this item and its potential for misuse, purchase orders are heavily restricted and subject to vetting on a case-by-case basis. Purchasers may be required to present additional identification and authorization before an order is approved.

IMAGE  
NOT FOUND

### EM-1 Flare Shot

+ Throw 3 explosive flares  
+ Chance to ignite enemies

With safety always guiding our hand, Shoraiteku Interstellar is pleased to equip all interplanetary vessels under its command with an emergency Flare Shot. Only to be used in extraordinary circumstances, this re-usable device will fire a blue signal flare intended to attract attention and aid to a stranded ship or pilot. If the device detects adverse conditions, it may on occasion deploy a more powerful white 'supernova' flare.

Please be aware that the flares fired with this device are extremely dangerous, and as such every precaution should be made to point the device away from anything you do not wish to see destroyed.

+ Apply shield that blocks 3 instances of damage

### Reactive Shield

Subject to the terms contained within the Shoraiteku Interstellar Employment Policy, you are recognised as being a fallible being with the ability to make mistakes. To aid in the amelioration of this trait, the production and distribution of the Reactive Shield has been instigated for employees deemed to be operating within hazardous or high-risk environments.

On activation the shield will fully negate three (3) instances of damage to the user, before being depleted. Any further instances of damage beyond this will be considered negligence on the part of the employee, and form grounds for a performance review pending the employee's survival.

## Gravity Boots

IMAGE  
NOT FOUND

Designed for the utmost safety when working both off- and on-planet, pairs of Shoraiteku Interstellar Gravity Boots have been made available to all eligible ships under the corporation's command.

Through the use of a proprietary intelligent monitoring system, the Gravity Boots are able to make informed assessments of the user's local environment and current needs, adjusting their sense of local gravity appropriately.

So, whether magnetised to a ship hull in the expanse of space or descending a steep drop at a controlled speed, you can be sure that your boots will always keep you and your equipment safe.

+ Passive slow fall

## Speed Boots

IMAGE  
NOT FOUND

HOT SOULZ® Speed Boots™ are the footwear that's taking the Core Worlds by storm! Amaze your parents with lightning fast speed, and no batteries required! With hundreds of colours and stylish designs, all that's left to do is lace\* up your new shoes and start living your life in the fast lane!

+ 80 speed

\* Auto-lace options also available.

## Explosive Armour

IMAGE  
NOT FOUND

For those bravest Shoraiteku Interstellar employees that are most often in harm's way, Explosive Armour can be applied for from your assigned equipment administrator. Built from the most resilient materials available within budget limitations, this item confers substantial protection against explosive and incendiary hazards.

Due to some previous confusion, it should be clearly stated that the item is to protect from explosives, and is not in itself an explosive device.

+ 100 explosive  
armour

## MagRail Meteor

For our most highly-valued customers, we are honoured to present the ultimate in on-demand destruction. Launched from a dedicated weapons platform orbiting above the Kaiser-Schmid corporate headquarters, the MagRail Meteor is a devastating projectile that can be activated on command, targeting any location across the galaxy with pinpoint accuracy\*.

+ Deploy MagRail  
meteor  
+ Explodes into cluster  
of Mega MagRail  
projectiles

\*Advertised target coverage is dependent on celestial body movement, and is not guaranteed. Access to the MagRail Meteor requires an active Kaiser-Schmid Exekutive subscription.

IMAGE

### MK-1 Laser Sight

Utilising the universal rail mountings found on the entire Kaiser-Schmid range, the Kaiser-Schmid Laser Sight MK-1 is the perfect stocking-filler for customers young or old. Once properly fitted, you'll find your aim measurably improved, helping to produce tighter, better controlled shots time after time.

Stop peppering your targets, and start hitting them where it hurts. Again and again, and again and again, until all that's left is a bloody mess of flesh and teeth.

+ Increased accuracy

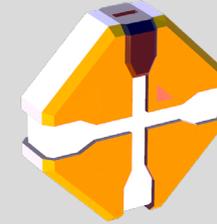

IMAGE  
NOT FOUND

### MK-2 Laser Sight

The highly-regarded universal Kaiser-Schmid Laser Sight is back, and much improved. Having undergone extensive redevelopment and testing to identify weak points in its design and function, the MK-1 now returns to you as the brand new MK-2. Boasting twice the internal power, twice the diodes, and twice the lasers, the MK-2 grants you unprecedented gains to accuracy. Now, not only are you more likely to hit where it hurts; you're more likely to hit where it kills.

+ Greatly increased  
accuracy  
+ 50 critical hit

### Nanomed Trauma Patch

+ Heals for 75 health

- Heal decays over  
time

The EvoTek Nanomed Trauma Patch is intended only for use in emergency, life-or-death situations. We recommend only applying the patch after a thorough consultation with a health professional. For use, follow the below instructions:

- Carefully tear open the packaging, leaving adhesive sleeve attached to the Trauma Patch.
- Remove the sleeve and apply over the site of the trauma, making sure to clean the area of blood or other fluids before application.
- Hold in place for three seconds, or until a severe burning sensation begins.

If the above instructions have been followed correctly, you will experience a short period of euphoria. Please keep in mind that this effect is temporary, and may be out of step with the lasting benefit of the Trauma Patch. After a short time, the euphoria will subside and you will be left with the physical results of the Trauma Patch.

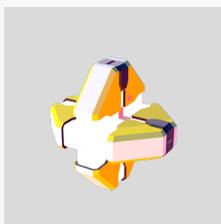

+ Increases healing received by 25%

## Nanomed Booster

Your custom with Evotek is greatly appreciated. To receive the most benefit from the Evotek Nanomed Booster, please carefully read the following directions. Upon use, the beneficiary will experience increased aid from other healing items, to a factor of +50%.

- The Evotek Nanomed Booster is not a healing item when taken alone. Please ensure that the beneficiary has access to official Evotek-branded healing items to be used in conjunction with the Nanomed Booster.
- The Evotek Nanomed Booster is intended for trauma victims only. Evotek does not condone recreational use of the Nanomed Booster.
- The Evotek Nanomed Booster should not be used to aid the healing of injuries sustained from criminal activity. Such a use is a breach of the Evotek User Agreement, and may incur a severe penalty for the user.

+ Allows healing past max health by 50

## Nanomed Overcharger

Congratulations on your acquisition of the Asklepios Nanomed Overcharger. While the exact workings of the Overcharger are not for public release, in layman's terms the device allows the user to 'store' additional 'life essence' in the Overcharger for emergency use at a later date.

Please note that your medcare provider or Corp must be notified of each use, as rates can be affected.

+ Automatic heal at low health

- One-time activation

## Nanomed Backup System

Thank you for your purchase of the Evotek Nanomed Backup System. To operate this product, please follow the instructions below.

- Remove the Evotek Nanomed Backup System from its packaging, making sure to retain the warranty.
- On first start up, the device will detect nearby vital signs. Review these and make sure to select the information relating to the intended recipient.
- On severe injury, the device will detect a drop in vital signs, and automatically administer medical aid to stabilize and restore the recipient's health.

Should you consider the device unsatisfactory for your purposes, please return the device and warranty (complete with packaging) to your point of purchase.

+ 100 speed  
+ 16 second duration

## Adrenaline Injector

SPEED UP™

Overtake the rest with the lightning-quick Adrenaline Injector from EXHANCE Energy Products. Sprint faster, run longer, react quicker; the Adrenaline Injector will take you from 0 to 60 in one quick jab. Outlawed from sporting events and retirement homes, one thing's for certain: This ain't your grandpa's performance enhancer.
